## How the Foot Soaks Work

The herbs in this formula act synergistically to improve blood circulation. The actions and temperature of the herbs will help the heart to pump faster – similar to going for a walk or exercising. This increase in circulation will help bring fresh blood to injured areas. Fresh blood brings oxygen and nutrients to improve the healing process.

The foot soaks also help improve immune system function, enhance metabolism and improve endocrine function.

## Hours

Tuesday and Thursday 9am-12pm

\$40.00 per soak.

Buy 10 get the 11th FREE.

Treatment bags also available for purchase.

The foot soaks represent an easy convenient and cost-effective way for you to improve your health at home. In just 30-45 minutes a night, you can speed up your healing process.

You must come in for a consult prior to purchasing foot soaks. It is important to diagnose appropriately to insure safety.

The soaks are not appropriate for patients with metastatic cancer, patients who are pregnant, or those who have open wounds/sores.
